

Highlights

- Ready-to-use labeled tag antibodies for PICO assays
- Reagents for 100s of dPCR or ddPCR reactions
- Quantify your tagged protein targets

Available Tag-LABs:

- Tag-LAB Anti-DYKDDDDK (#PICO-001004)
- Tag-LAB Anti-GFPa (#PICO-001005)
- Tag-LAB Anti-GFPb (#PICO-001006)
- Tag-LAB Anti-STREP (#PICO-001007)#
- Tag-LAB Anti-HIS6 (#PICO-001008)
- Tag-LAB Anti-HIS5 (#PICO-001009)
- Tag-LAB Anti-TRX (#PICO-001010)

Further analysis with:

- PICO Amplification Core Kit (#PICO-000010)
- PICO Probes (#PICO-000070-73)

*anti-Strep-tag II antibody [11A7] (abcam - ab255890)

Labeled Tag Antibodies for PICO Assays

Introducing Tag-LABs for PICO Assays!

Analyze your tagged proteins with PICO using our Labeled Tag Antibodies (**Tag-LABs**). These highly specific antibodies are conjugated with PICO Labels, using our advanced PICOglue Antibody Labeling technology, providing ready-to-use reagents for PICO assays. Elevate your protein analysis with Tag-LABs – the perfect companion for your PICO assays!

Key features:

- **Versatile Assays:** Choose from a range of labeled tag antibodies against DYKDDDDK, GFP, STREP#, HIS (5x or 6x), and thioredoxin (TRX).
- **Efficient Labeling:** Our PICOglue Antibody Labeling technology ensures up to 100% labeling efficiency for accurate quantification.
- **Quantification:** Achieve precise quantification of proteins, protein interactions, and post-translational modifications.

Product Details:

- **Compatibility:** Each Tag-LAB is sufficient to run 100s of dPCR or ddPCR experiments
- **Fluorescent Channels:** Tag-LABs are available with PICOglue BL or P8 Labels, covering FAM and HEX channels respectively.
- **High Quality Antibodies:** Each antibody was specifically selected for high performance PICO assays.
- **Custom Solutions:** For custom labeling with other PICO Labels, reach out to us at sales@actome.de.
